PROVEN & TRUSTED

We have streamed the world's most prestigious events because we believe in redundancy above all else. To ensure that every event is successful, we have built custom systems to monitor all of our hardware and feeds, to ensure that any downtime is pinpointed within seconds, backup feeds are automatically initiated and the user has a flawless viewing experience. We have taken the broadcast mentality and forged a new path forward for online streaming reliability.

ACQUISITION

Our Marina del Rey facility boasts redundant 10 gigabit ISPs, 11 satellite antennas and is connected to more fiber circuits than we can count. We can pull feeds from around the world and by working with some amazing partners, such as The Switch, Pac-TV, & Zayo, we can pass the cost savings on to our customers.

- Satellite
- Fiber
- IP

ENCODING

Every project has its own needs. We have the encoders to match. Whether it's a stack of Wowzas, Ciscos, or full-blown 4K Elementals, we've got you covered.

We encode into as many formats & bitrates as needed:

- MPEG Dash
- Apple HLS
- Adobe HDS
- Microsoft Smooth Streaming
- RTMP

DELIVERY

Our long-standing partnership with the world's best CDN, Akamai, allows us to scale without limits. We have delivered streams to users in over 100 countries during some of the world's largest events with 99.999% uptime.

Our TOC staff can include additional features to your project, whether it's for web, an onpass or for OTT:

- Closed-Captions
- Ad Insertion
- Slates
- DVR/VOD
